

Pantera Electrical Bottom Bailer

The Pantera Electrical Bottom Bailer or PEBB® is a Non-Explosive tool used for dumping cement, bridging support, chemicals, and other materials into the wellbore. Can be use on subsequent runs as does not have to tag hard bottom surface in order to activate.

The PEBB is extremely easy to operate thanks to a surface command box that activates the DC motor and slide open and close the outer sleeve to expose the ports and the content of the bailers connected on top.

Once in surface the PEBB can get reset to close position mode in no time. Uses no oil nor springs.

Specifications

Model	PEBB-A
Diameter	1 11/16"
Weight	6 Lbs.
Length	19.5 in.
Material	SS316
Operating Voltage	30-48 VDC
Number of Ports	4
Total area of ports	4.3 in ²
Temperature Rating	302 °F
Pressure Rating	10000 Lbs.

Pantera Electrical Bottom Bailer

Features

- Total ports area 4.3in².
- Surface command box for quick operation.
- Low maintenance cost.
- Non-Explosive.
- Stainless Steel Material.
- Suitable for gravel dumping.
- Easy to use and maintain.

Application

- Dumping Cement, bridging material or chemicals.

Benefits

- Low-cost equipment.
- Big port area for easy dump of gravel durability.
- Can be combined with bailers of different diameters.
- Minimal redress every 50 runs.
- Corrosion resistant.
